

In the name of God, Most Gracious, Most Merciful

These are the instructions to activate the bomb. Please read all the instructions before you start:

- 1- There is a mobile phone inside the envelop. You will need this phone to detonate the bomb after you prepare it.
- 2- Follow the below instructions completely and in order.
- 3- Inside the car you will find another mobile phone installed in the car. Open the phone cover and press the on button until the phone turns on. After that, do not touch this phone at all.
- 4- To activate the bomb, lift the cover between the driver's seat and the passenger's seat. You will see the electrical activator. Do not remove the activator from its place at all.
- 5- Move the rotating timer until it reads between the "2" and "4" hours. This step should be the first in the process.
- 6- After that, move the green cover next to the activator towards the passenger's seat. This cover prevents the activation of the silver switch by accident.
- 7- Next, move the silver switch towards the passenger's seat.
- 8- After that, a blue light will appear which indicates that the bomb will detonate at the expiration of the timer.
- 9- Get out of the car, take the keys with you or leave them inside the car and lock the doors.
- 10- This is the guaranteed method of detonation when the timer expires, in case detonating by the mobile phone fails.
- 11- When you are at a safe distance from the building, lift the cover of the phone that was provided to you, and turn the phone on.
- 12- Dial the number that is written on the back of the phone and use this phone itself. The phone will detonate the bomb. This is the primary method to detonate the bomb.
- 13- Do not leave this instruction paper. Take this instruction paper with you, and get rid of it at a later time.
